Section 26. KRS 156.070 is amended to read as follows:

(1) The Kentucky Board of Education shall have the management and control of the common schools and all programs operated in these schools, including interscholastic athletics, the Kentucky School for the Deaf, the Kentucky School for the Blind, and community education programs and services.

(2) The Kentucky Board of Education may designate an organization or agency to manage interscholastic athletics in the common schools, provided that the rules, regulations, and bylaws of any organization or agency so designated shall be approved by the board, and provided further that any administrative hearing conducted by the designated managing organization or agency shall be conducted in accordance with KRS Chapter 13B.

(a) The state board or its designated agency shall assure through promulgation of administrative regulations that if a secondary school sponsors or intends to sponsor an athletic activity or sport that is similar to a sport for which National Collegiate Athletic Association members offer an athletic scholarship, the school shall sponsor the athletic activity or sport for which a scholarship is offered. The administrative regulations shall specify which athletic activities are similar to sports for which National Collegiate Athletic Association members offer scholarships.

(b) Beginning with the 2003-2004 school year, the state board shall require any agency or organization designated by the state board to manage interscholastic athletics to adopt bylaws that establish as members of the agency's or organization's board of control one (1) representative of nonpublic member schools who is elected by the nonpublic school members of the agency or organization from regions one (1) through eight (8) and one (1) representative of nonpublic member schools who is elected by the nonpublic member schools of the agency or organization from regions nine (9) through sixteen (16). The nonpublic school representatives on the board of control shall not be from classification A1 or D1 schools. Following initial election of these nonpublic school representatives to the agency's or organization's board of control, terms of the nonpublic school representatives shall be staggered so that only one (1) nonpublic school member is elected in each even-numbered year.

(c) The state board or any agency designated by the state board to manage interscholastic athletics shall not promul-
gate rules, administrative regulations, or bylaws that prohibit pupils in grades seven (7) to eight (8) from participating in any high school sports except for high school varsity soccer and football, or from participating on more than one (1) school-sponsored team at the same time in the same sport. The Kentucky Board of Education, or an agency designated by the board to manage interscholastic athletics, may promulgate administrative regulations restricting, limiting, or prohibiting participation in high school varsity soccer and football for students who have not successfully completed the eighth grade.

(d) Every local board of education shall require an annual medical examination performed and signed by a physician, physician assistant, advanced practice registered nurse practitioner, or chiropractor, if performed within the professional's scope of practice, for each student seeking eligibility to participate in any high school athletic activity or sport. The Kentucky Board of Education or any organization or agency designated by the state board to manage interscholastic athletics shall not promulgate administrative regulations or adopt any policies or bylaws that are contrary to the provisions of this paragraph.

(e) Any student who turns nineteen (19) years of age prior to August 1 shall not be eligible for high school athletics in Kentucky. Any student who turns nineteen (19) years of age on or after August 1 shall remain eligible for that school year only. An exception to the provisions of this paragraph shall be made, and the student shall be eligible for high school athletics in Kentucky if the student:

1. Qualified for exceptional children services and had an individual education program developed by an admissions and release committee (ARC) while the student was enrolled in the primary school program;

2. Was retained in the primary school program because of an ARC committee recommendation; and

3. Has not completed four (4) consecutive years or eight (8) consecutive semesters of eligibility following initial promotion from grade eight (8) to grade nine (9).

(f) If the state board or any agency designated by the state board to manage interscholastic athletics promulgates administrative regulations that permit a school district to employ or assign nonteaching personnel to serve in a coaching position, those administrative regulations shall apply to all sports and sports activities, including basketball and football. The administrative regulations shall give preference to the hiring or assignment of certified personnel over nonteaching personnel in coaching positions.

(3) (a) The Kentucky Board of Education is hereby authorized to lease from the State Property and Buildings Commission, or others, whether public or private, any lands, buildings, structures, installations, and facilities suitable for use in establishing and furthering television and related facilities as an aid or supplement to classroom instruction, throughout the Commonwealth, and for incidental use in any other proper public functions. The lease may be for any initial term commencing with the date of the lease and ending with the next ensuing June 30, which is the close of the then-current fiscal biennium of the Commonwealth, with exclusive options in favor of the board to renew the same for successive ensuing bienniums, July 1 in each even year to June 30 in the next ensuing even year; and the rentals may be fixed at the sums in each biennium, if renewed, sufficient to enable the State Property and Buildings Commission to pay therefrom the maturing principal of and interest on, and provide reserves for, any revenue bonds which the State Property and Buildings Commission may determine to be necessary and sufficient, in agreement with the board, to provide the cost of acquiring the television and related facilities, with appurtenances, and costs as may be incident to the issuance of the bonds.

(b) Each option of the Kentucky Board of Education to renew the lease for a succeeding biennial term may be exercised at any time after the adjournment of the session of the General Assembly at which appropriations shall have been made for the operation of the state government for such succeeding biennial term, by notifying the State Property and Buildings Commission in writing, signed by the chief state school officer, and delivered to the secretary of the Finance
and Administration Cabinet as a member of the commission. The option shall be deemed automatically exercised, and the lease automatically renewed for the succeeding biennium, effective on the first day thereof, unless a written notice of the board's election not to renew shall have been delivered in the office of the secretary of the Finance and Administration Cabinet before the close of business on the last working day in April immediately preceding the beginning of the succeeding biennium.

(c) The Kentucky Board of Education shall not itself operate leased television facilities, or undertake the preparation of the educational presentations or films to be transmitted thereby, but may enter into one (1) or more contracts to provide therefor, with any public agency and instrumentality of the Commonwealth having, or able to provide, a staff with proper technical qualifications, upon which agency and instrumentality the board, through the chief state school officer and the Department of Education, is represented in such manner as to coordinate matters of curriculum with the curricula prescribed for the public schools of the Commonwealth. Any contract for the operation of the leased television or related facilities may permit limited and special uses of the television or related facilities for other programs in the public interest, subject to the reasonable terms and conditions as the board and the operating agency and instrumentality may agree upon; but any contract shall affirmatively forbid the use of the television or related facilities, at any time or in any manner, in the dissemination of political propaganda or in furtherance of the interest of any political party or candidate for public office, or for commercial advertising. No lease between the board and the State Property and Buildings Commission shall bind the board to pay rentals for more than one (1) fiscal biennium at a time, subject to the aforesaid renewal options. The board may receive and may apply to rental payments under any lease and to the cost of providing for the operation of the television or related facilities not only appropriations which may be made to it from state funds, from time to time, but also contributions, gifts, matching funds, devises, and bequests from any source, whether federal or state, and whether public or private, so long as the same are not conditioned upon any improper use of the television or related facilities in a manner inconsistent with the provisions of this subsection.

(4) The state board may, on the recommendation and with the advice of the chief state school officer, prescribe, print, publish, and distribute at public expense such administrative regulations, courses of study, curriculums, bulletins, programs, outlines, reports, and placards as each deems necessary for the efficient management, control, and operation of the schools and programs under its jurisdiction. All administrative regulations published or distributed by the board shall be enclosed in a booklet or binder on which the words “informational copy” shall be clearly stamped or printed.

(5) Upon the recommendation of the chief state school officer or his designee, the state board shall establish policy or act on all matters relating to programs, services, publications, capital construction and facility renovation, equipment, litigation, contracts, budgets, and all other matters which are the administrative responsibility of the Department of Education.

The National Technical Advisory Panel shall submit its determination to the commissioner of education and the Legislative Research Commission;

(e) Taking and keeping a school census, and the forms, blanks, and software to be used in taking and keeping the census and in compiling the required reports. The board shall create a statewide student identification numbering system based on students' Social Security numbers. (f) Sanitary and protective construction of public school buildings, toilets, physical equipment of school grounds, school buildings, and classrooms. With respect to physical standards of sanitary and protective construction for school buildings, the Kentucky Board of Education shall adopt the Uniform State Building Code;

The administrative regulations shall permit a student who received a physical examination no more than six (6) months prior to his initial admission to Head Start to substitute that physical examination for the physical examination required by the Kentucky Board of Education of all students upon initial admission to the public schools, if the physical examination given in the Head Start program meets all the requirements of the physical examinations prescribed by the Kentucky Board of Education;

(h) A vision examination by an optometrist or ophthalmologist that shall be required by the Kentucky Board of Education. The administrative regulations shall require evidence that a vision examination that meets the criteria prescribed by the Kentucky Board of Education has been performed. ginning in the 1996-97 school year, a request for waiver of any administrative regulation shall be submitted to the
Kentucky Board of Education in writing with appropriate justification for the waiver. The Kentucky Board of Edu-
cation may approve the request when the school district or school has demonstrated circumstances that may include
but are not limited to the following:

1. An alternative approach will achieve the same result required by the administrative regulation;

2. Implementation of the administrative regulation will cause a hardship on the school district or school or jeopardize
the continuation or development of programs; or

(b) The following shall not be subject to waiver:

1. Administrative regulations relating to health and safety;

upon issues relating to the grade configuration of schools.

(c) Any waiver granted under this subsection shall be subject to revocation upon a determination by the Kentucky
Board of Education that the school district or school holding the waiver has subsequently failed to meet the intent of
the waiver.

(3) Any private, parochial, or church school may voluntarily comply with curriculum, certification, and textbook

1. Has been trained by the delegating physician or delegating nurse for the specific health service, if that health service is one that could be delegated by the physician or nurse within his or her scope of practice; and

2. Has been approved in writing by the delegating physician or delegating nurse. The approval shall state that the

The school employee shall acknowledge receipt of training by signing the approval form. A copy of the approval form shall be maintained in the student's record and the personnel file of the school employee. A delegation to a school employee under this paragraph shall be valid only for the current school year.

(3) If no school employee has been trained and delegated responsibility to perform a health service, the school district shall make any necessary arrangement for the provision of the health service to the student in order to prevent a loss of a health service from affecting the student's attendance or program participation. The school district shall continue with this arrangement until appropriate school personnel are delegated the responsibility for health care in subsection (2) of this section.

(4) A school employee who has been properly delegated responsibility for performing a medical procedure under this section shall act as an agent of the school and be granted liability protection under the Federal Paul P. Coverdell Teacher Liability Protection Act of 2001, Pub. L. No. 107-110, unless the claimant establishes by clear and convincing evidence that harm was proximately caused by an act or omission of the school employee that constitutes negligence, willful or criminal misconduct, or a conscious, flagrant indifference to the rights and safety of the individual harmed.

(5) Nothing in this section shall be construed to deny a student his or her right to attend public school and to receive public school services, or to deny, prohibit, or limit the administration of emergency first aid or emergency procedures.

Section 30. KRS 159.030 is amended to read as follows:

(b) Who is enrolled and in regular attendance in a private, parochial, or church regular day school. It shall be the duty of each private, parochial, or church regular day school to notify the local board of education of those students in attendance at the school. If a school declines, for any reason, to notify the local board of education of those students in attendance, it shall so notify each student's parent or legal guardian in writing, and it shall then be the duty of the parent or legal guardian to give proper notice to the local board of education; or

(a) A signed statement of a licensed physician, **advanced practice** registered nurse-practitioner, psychologist, psychiatrist, chiropractor, or public health officer, that the condition of the child prevents or renders inadvisable attendance at school or application to study. On the basis of such evidence, the board may exempt the child from compulsory attendance. Any child who is excused from school attendance more than six (6) months shall have two (2) signed statements from a combination of the following professional persons: a licensed physician, **advanced practice** registered nurse-practitioner, psychologist, psychiatrist, chiropractor, and health officer, except that this requirement shall not apply to a child whose treating physician, **advanced practice** registered nurse-practitioner, chiropractor, or public health officer certifies that the student has a chronic physical condition that prevents or renders inadvisable attendance at school or application to study and is unlikely to substantially improve within one (1) year; or

(b) An individual education plan specifying that placement of the child with a disability at home or in a hospital is the least restrictive environment for providing services.

Exemptions of all children under the provisions of subsection (1)(d) of this section shall be reviewed annually with the evidence required being updated, except that for an exceptional child whose treating physician, **advanced practice** registered nurse-practitioner, chiropractor, or public health officer certifies that the student has a chronic physical condition unlikely to substantially improve within three (3) years, the child's admissions and release committee shall annually consider the child's condition and the existing documentation to determine whether updated evidence is required. Updated evidence shall be provided for a child upon determination of need by the admissions and release committee, or at least every three (3) years.

(3) For any child who is excluded under the provisions of subsection (1)(d) of this section, home, hospital, institutional, or other regularly scheduled and suitable instruction meeting standards, rules, and regulations of the Kentucky Board of Education shall be provided.

(2) An appointing authority, with the approval of the secretary of personnel, may permit an employee of the agency to receive leave under this section if:

(2) (a) On or before July 1, 1995, the Commission on the Deaf and Hard of Hearing shall establish a program to distribute specialized telecommunications equipment to any deaf, hard-of-hearing, or speech-impaired person qualified to receive the equipment pursuant to subsection (3) of this section.

(b) Prior to the establishment of the Telecommunications Access Program, the Commission on the Deaf and Hard of Hearing shall initiate an investigation, conduct public hearings, and solicit the advice and counsel of deaf, hard-of-hearing, and speech-impaired persons and the organizations serving them.

A family child-care provider caring for three (3) or fewer children may apply for certification of the provider's home at the discretion of the provider. Applicants for certification shall not have been found by the cabinet or a court to have abused or neglected a child, and shall meet the following minimum requirements:

   b. Recognizing and reporting child abuse; and

   c. Developmentally appropriate child-care practice.

(b) Initial applications for certification shall be made to the department and shall be accompanied by a ten dollar ($10)
certification fee. The department shall issue a certificate of operation upon inspecting the family child-care home and determining the provider's compliance with the provisions of this section. The inspection shall be unannounced. A certificate of operation issued pursuant to this section shall not be transferable and shall be renewed every two (2) years for a fee of ten dollars ($10).

(c) A certified family child-care provider shall display the certificate of operation in a prominent place within the residence in which care is provided. The cabinet shall provide the certified family child-care provider with written information explaining the requirements for a family day-care provider and instructions on the method of reporting violations of the requirements which the provider shall distribute to parents.

(d) Upon request of any person, the cabinet shall provide information regarding the denial, revocation, suspension, or violation of any type of day-care license of the family child-care provider. Identifying information regarding children and their families shall remain confidential.

(e) The cabinet shall provide, upon request, public information regarding the inspections of and the plans of correction for the family child-care home within the past year. A denial, suspension, or revocation of a certificate may be appealed, and upon appeal an administrative hearing shall be conducted in accordance with KRS Chapter 13B. If the cabinet has probable cause to believe that there is an immediate threat to the public health, safety, or welfare, the cabinet may take emergency action to suspend a certificate pursuant to KRS 13B.125. The cabinet shall promulgate administrative regulations to impose minimum staff-to-child ratios. The cabinet may promulgate administrative regulations relating to other requirements necessary to ensure minimum safety in family child-care homes. The cabinet shall develop and provide an “easy-to-read” guide containing the following information to a family child-care provider seeking certification of his home:

1. Certification requirements and procedures;

Section 72. KRS 214.010 is amended to read as follows: Every physician and advanced practice registered nurse shall report all diseases designated by administrative regulation of the Cabinet for Health and Family Services as reportable which are under his or her special treatment to the local board of health of his or her county, and every
head of a family shall report any of the designated said diseases, when known by him or her to exist in his or her family, to the local board or to some member thereof in accordance with the administrative regulations of the Cabinet for Health and Family Services.

Section 73. KRS 214.181 is amended to read as follows:

(1) The General Assembly finds that the use of tests designed to reveal a condition indicative of human immunodeficiency virus (HIV) infection can be a valuable tool in protecting the public health. The General Assembly finds that knowledge of HIV status is increasingly important for all persons since treatment using antiretroviral medications can slow disease progression, prolong and improve the lives of HIV-positive individuals, and reduce the likelihood of perinatal mother-to-child transmission. Many members of the public are deterred from seeking testing because they misunderstand the nature of the test or fear that test results will be disclosed without their consent. The General Assembly finds that the public health will be served by facilitating informed, voluntary, and confidential use of tests designed to detect human immunodeficiency virus infection.

(2) A person who has signed a general consent form for the performance of medical procedures and tests is not required to also sign or be presented with a specific consent form relating to medical procedures or tests to determine human immunodeficiency virus infection, antibodies to human immunodeficiency virus, or infection with any other causative agent of acquired immunodeficiency syndrome that will be performed on the person during the time in which the general consent form is in effect. However, a general consent form shall instruct the patient that, as part of the medical procedures or tests, the patient may be tested for human immunodeficiency virus infection, hepatitis, or any other blood-borne infectious disease if a doctor or advanced practice registered nurse orders the test for diagnostic purposes. Except as otherwise provided in subsection (5)(d) of this section, the results of a test or procedure to determine human immunodeficiency virus infection, antibodies to human immunodeficiency virus, or infection with any probable causative agent of acquired immunodeficiency syndrome performed under the authorization of a general consent form shall be used only for diagnostic or other purposes directly related to medical treatment.

(3) In any emergency situation where informed consent of the patient cannot reasonably be obtained before providing health-care services, there is no requirement that a health-care provider obtain a previous informed consent.

(4) The physician or advanced practice registered nurse who orders the test pursuant to subsections (1) and (2) of this section, or the attending physician, shall be responsible for informing the patient of the results of the test if the test results are positive for human immunodeficiency virus infection. If the tests are positive, the physician or advanced practice registered nurse shall also be responsible for either:

(a) Providing information and counseling to the patient concerning his infection or diagnosis and the known medical implications of such status or condition; or

(b) Referring the patient to another appropriate professional or health-care facility for the information and counseling.

(5) (a) No person in this state shall perform a test designed to identify the human immunodeficiency virus, or its antigen or antibody, without first obtaining the informed consent of the person upon whom the test is being performed, except as specified in subsections (2) and (3) of this section.

(b) No test result shall be determined as positive, and no positive test result shall be revealed to any person, without corroborating or confirmatory tests being conducted.

(c) 1. Nothing in this subsection shall be construed as prohibiting the disclosure to the patient of preliminary positive results from HIV rapid tests if results are delivered with an explanation of the following:

a. The meaning of a reactive rapid test;
b. The importance of confirmatory testing; and

c. The importance of taking precautions to reduce the risk of infecting others while awaiting the results of confirmatory testing.

2. In special cases where immediate actions may be necessary to protect a patient, such as potential perinatal transmission or incidents warranting post-exposure prophylaxis, a preliminary positive result from a HIV rapid test may be disclosed to the patient and used as a basis to recommend options for prophylaxis or treatment.

(d) No person who has obtained or has knowledge of a test result pursuant to this section shall disclose or be compelled to disclose the identity of any person upon whom a test is performed, or the results of the test in a manner which permits identification of the subject of the test, except to the following persons:

1. The subject of the test or the subject's legally authorized representative;

2. Any person designated in a legally effective release of the test results executed prior to or after the test by the subject of the test or the subject's legally authorized representative;

3. A physician, nurse, or other health-care personnel who has a legitimate need to know the test result in order to provide for his protection and to provide for the patient's health and welfare;

4. Health-care providers consulting between themselves or with health-care facilities to determine diagnosis and treatment;

5. The cabinet, in accordance with rules for reporting and controlling the spread of disease, as otherwise provided by state law;

6. A health facility or health-care provider which procures, processes, distributes, or uses:

a. A human body part from a deceased person, with respect to medical information regarding that person; or

b. Semen provided prior to the effective date of this section for the purpose of artificial insemination;

7. Health facility staff committees, for the purposes of conducting program monitoring, program evaluation, or service reviews;

8. Authorized medical or epidemiological researchers who shall not further disclose any identifying characteristics or information;

9. A person allowed access by a court order that is issued in compliance with the following provisions:

a. No court of this state shall issue an order to permit access to a test for human immunodeficiency virus performed in a medical or public health setting to any person not authorized by this section or by KRS 214.420. A court may order an individual to be tested for human immunodeficiency virus only if the person seeking the test results has demonstrated a compelling need for the test results which cannot be accommodated by other means. In assessing compelling need, the court shall weigh the need for testing and disclosure against the privacy interest of the test subject and the public interest which may be disserved by disclosure which deters blood, organ, and semen donation and future human-immunodeficiency-virus-related testing or which may lead to discrimination. This paragraph shall not apply to blood bank donor records;
b. Pleadings pertaining to disclosure of test results shall substitute a pseudonym for the true name of the subject of the test. The disclosure to the parties of the subject's true name shall be communicated confidentially, in documents not filed with the court;

c. Before granting any order, the court shall provide the individual whose test result is in question with notice and a reasonable opportunity to participate in the proceedings if he or she is not already a party;

d. Court proceedings as to disclosure of test results shall be conducted in camera, unless the subject of the test agrees to a hearing in open court or unless the court determines that a public hearing is necessary to the public interest and the proper administration of justice;

e. Upon the issuance of an order to disclose test results, the court shall impose appropriate safeguards against unauthorized disclosure, which shall specify the persons who may have access to the information, the purposes for which the information shall be used, and appropriate prohibitions on future disclosure.

No person to whom the results of a test have been disclosed shall disclose the test results to another person except as authorized by this subsection. When disclosure is made pursuant to this subsection, it shall be accompanied by a statement in writing that includes the following or substantially similar language: “This information has been disclosed to you from records whose confidentiality is protected by state law. State law prohibits you from making any further disclosure of such information without the specific written consent of the person to whom such information pertains, or as otherwise permitted by state law. A general authorization for the release of medical or other information is NOT sufficient for this purpose.” An oral disclosure shall be accompanied by oral notice and followed by a written notice within ten (10) days.

(6) (a) The Cabinet for Health and Family Services shall establish a network of voluntary human immunodeficiency virus testing programs in every county in the state. These programs shall be conducted in each public health department established under the provisions of KRS Chapter 212. Additional programs may be contracted to other private providers to the extent that finances permit and local circumstances dictate.

(b) Each public health department shall have the ability to provide counseling and testing for the human immunodeficiency virus to each patient who receives services and shall offer the testing on a voluntary basis to each patient who requests the test.

c) Each public health department shall provide a program of counseling and testing for human immunodeficiency virus infection, on an anonymous or confidential basis, dependent on the patient's desire. If the testing is performed on an anonymous basis, only the statistical information relating to a positive test for human immunodeficiency virus infection shall be reported to the cabinet. If the testing is performed on a confidential basis, the name and other information specified under KRS 214.645 shall be reported to the cabinet. The cabinet shall continue to provide for anonymous testing and counseling.

d) The result of a serologic test conducted under the auspices of the cabinet shall not be used to determine if a person may be insured for disability, health, or life insurance or to screen or determine suitability for, or to discharge a person from, employment. Any person who violates the provisions of this subsection shall be guilty of a Class A misdemeanor.

(7) No public health department and no other private or public facility shall be established for the primary purpose of conducting a testing program for acquired immunodeficiency syndrome, acquired immunodeficiency syndrome related complex, or human immunodeficiency virus status without first registering with the cabinet, complying with all other applicable provisions of state law, and meeting the following requirements:
(a) The program shall be directed by a person who has completed an educational course approved by the cabinet in the
counseling of persons with acquired immunodeficiency syndrome, acquired immunodeficiency syndrome related
complex, or human immunodeficiency virus infection;

(b) The program shall have all medical care supervised by a physician licensed under the provisions of KRS Chapter
311;

(c) The program shall have all laboratory procedures performed in a laboratory licensed under the provisions of KRS
Chapter 333;

(d) Informed consent shall be required prior to testing. Informed consent shall be preceded by an explanation of the
test, including its purpose, potential uses, and limitations and the meaning of its results;

(e) The program, unless it is a blood donor center, shall provide pretest counseling on the meaning of a test for human
immunodeficiency virus, including medical indications for the test; the possibility of false positive or false negative
results; the potential need for confirmatory testing; the potential social, medical, and economic consequences of a
positive test result; and the need to eliminate high-risk behavior;

(f) The program shall provide supplemental corroborative testing on all positive test results before the results of any
positive test is provided to the patient;

(g) The program shall provide post-test counseling, in person, on the meaning of the test results; the possible need for
additional testing; the social, medical, and economic consequences of a positive test result; and the need to eliminate
behavior which might spread the disease to others;

(h) Each person providing post-test counseling to a patient with a positive test result shall receive specialized training,
to be specified by regulation of the cabinet, about the special needs of persons with positive results, including recog-
nition of possible suicidal behavior, and shall refer the patient for further health and social services as appropriate;

(i) When services are provided for a charge during pretest counseling, testing, supplemental testing, and post-test
counseling, the program shall provide a complete list of all charges to the patient and the cabinet; and

(j) Nothing in this subsection shall be construed to require a facility licensed under KRS Chapter 333 or a person
licensed under the provisions of KRS Chapters 311, 312, or 313 to register with the cabinet if he or she does not
advertise or hold himself or herself out to the public as conducting testing programs for human immunodeficiency
virus infection or specializing in such testing.

(8) Any violation of this section by a licensed health-care provider shall be a ground for disciplinary action contained
in the professional's respective licensing chapter.

(9) Except as provided in subsection (6)(d) of this section, insurers and others participating in activities related to the
insurance application and underwriting process shall be exempt from this section.

(10) The cabinet shall develop program standards consistent with the provisions of this section for counseling and
testing persons for the human immunodeficiency virus.

Section 74. KRS 214.625 is amended to read as follows:(1) The General Assembly finds that the use of tests designed
to reveal a condition indicative of human immunodeficiency virus (HIV) infection can be a valuable tool in protecting
the public health. The General Assembly finds that despite current scientific knowledge that zidovudine (AZT) prolongs the lives of acquired immunodeficiency syndrome victims, and may also be effective when introduced in the early stages of human immunodeficiency virus infection, many members of the public are deterred from seeking testing because they misunderstand the nature of the test or fear that test results will be disclosed without their consent. The General Assembly finds that the public health will be served by facilitating informed, voluntary, and confidential use of tests designed to detect human immunodeficiency virus infection.

(2) A person who has signed a general consent form for the performance of medical procedures and tests is not required to also sign or be presented with a specific consent form relating to medical procedures or tests to determine human immunodeficiency virus infection, antibodies to human immunodeficiency virus, or infection with any other causative agent of acquired immunodeficiency syndrome that will be performed on the person during the time in which the general consent form is in effect. However, a general consent form shall instruct the patient that, as part of the medical procedures or tests, the patient may be tested for human immunodeficiency virus infection, hepatitis, or any other blood-borne infectious disease if a doctor or advanced practice registered nurse orders the test for diagnostic purposes. Except as otherwise provided in subsection (5)(c) of this section, the results of a test or procedure to determine human immunodeficiency virus infection, antibodies to human immunodeficiency virus, or infection with any probable causative agent of acquired immunodeficiency syndrome performed under the authorization of a general consent form shall be used only for diagnostic or other purposes directly related to medical treatment.

(3) In any emergency situation where informed consent of the patient cannot reasonably be obtained before providing health-care services, there is no requirement that a health-care provider obtain a previous informed consent.

(4) The physician or advanced practice registered nurse who orders the test pursuant to subsections (1) and (2) of this section, or the attending physician, shall be responsible for informing the patient of the results of the test if the test results are positive for human immunodeficiency virus infection. If the tests are positive, the physician or advanced practice registered nurse shall also be responsible for either:

(a) Providing information and counseling to the patient concerning his infection or diagnosis and the known medical implications of such status or condition; or

(b) Referring the patient to another appropriate professional or health-care facility for the information and counseling.

(5) (a) No person in this state shall perform a test designed to identify the human immunodeficiency virus, or its antigen or antibody, without first obtaining the informed consent of the person upon whom the test is being performed, except as specified in subsections (2) and (3) of this section.

(b) No test result shall be determined as positive, and no positive test result shall be revealed to any person, without corroborating or confirmatory tests being conducted.

(c) No person who has obtained or has knowledge of a test result pursuant to this section shall disclose or be compelled to disclose the identity of any person upon whom a test is performed, or the results of the test in a manner which permits identification of the subject of the test, except to the following persons:

1. The subject of the test or the subject's legally authorized representative;

2. Any person designated in a legally effective release of the test results executed prior to or after the test by the subject of the test or the subject's legally authorized representative;

3. A physician, nurse, or other health-care personnel who has a legitimate need to know the test result in order to provide for his protection and to provide for the patient's health and welfare;
4. Health-care providers consulting between themselves or with health-care facilities to determine diagnosis and treatment;

5. The cabinet, in accordance with rules for reporting and controlling the spread of disease, as otherwise provided by state law;

6. A health facility or health-care provider which procures, processes, distributes, or uses:
   a. A human body part from a deceased person, with respect to medical information regarding that person; or
   b. Semen provided prior to July 13, 1990, for the purpose of artificial insemination;

7. Health facility staff committees, for the purposes of conducting program monitoring, program evaluation, or service reviews;

8. Authorized medical or epidemiological researchers who shall not further disclose any identifying characteristics or information;

9. A parent, foster parent, or legal guardian of a minor; a crime victim; or a person specified in KRS 438.250;

10. A person allowed access by a court order which is issued in compliance with the following provisions:
   a. No court of this state shall issue an order to permit access to a test for human immunodeficiency virus performed in a medical or public health setting to any person not authorized by this section or by KRS 214.420. A court may order an individual to be tested for human immunodeficiency virus only if the person seeking the test results has demonstrated a compelling need for the test results which cannot be accommodated by other means. In assessing compelling need, the court shall weigh the need for testing and disclosure against the privacy interest of the test subject and the public interest which may be disserved by disclosure which deters blood, organ, and semen donation and future human immunodeficiency virus-related testing or which may lead to discrimination. This paragraph shall not apply to blood bank donor records;
   b. Pleadings pertaining to disclosure of test results shall substitute a pseudonym for the true name of the subject of the test. The disclosure to the parties of the subject's true name shall be communicated confidentially, in documents not filed with the court;
   c. Before granting any order, the court shall provide the individual whose test result is in question with notice and a reasonable opportunity to participate in the proceedings if he is not already a party;
   d. Court proceedings as to disclosure of test results shall be conducted in camera, unless the subject of the test agrees to a hearing in open court or unless the court determines that a public hearing is necessary to the public interest and the proper administration of justice; and
   e. Upon the issuance of an order to disclose test results, the court shall impose appropriate safeguards against unauthorized disclosure, which shall specify the persons who may have access to the information, the purposes for which the information shall be used, and appropriate prohibitions on future disclosure.

No person to whom the results of a test have been disclosed shall disclose the test results to another person except as authorized by this subsection. When disclosure is made pursuant to this subsection, it shall be accompanied by a
statement in writing which includes the following or substantially similar language: “This information has been disclosed to you from records whose confidentiality is protected by state law. State law prohibits you from making any further disclosure of such information without the specific written consent of the person to whom such information pertains, or as otherwise permitted by state law. A general authorization for the release of medical or other information is NOT sufficient for this purpose.” An oral disclosure shall be accompanied by oral notice and followed by a written notice within ten (10) days.

(6) (a) The Cabinet for Health and Family Services shall establish a network of voluntary human immunodeficiency virus testing programs in every county in the state. These programs shall be conducted in each public health department established under the provisions of KRS Chapter 211. Additional programs may be contracted to other private providers to the extent that finances permit and local circumstances dictate.

(b) Each public health department shall have the ability to provide counseling and testing for the human immunodeficiency virus to each patient who receives services and shall offer the testing on a voluntary basis to each patient who requests the test.

(c) Each public health department shall provide a program of counseling and testing for human immunodeficiency virus infection, on an anonymous or confidential basis, dependent on the patient's desire. If the testing is performed on an anonymous basis, only the statistical information relating to a positive test for human immunodeficiency virus infection shall be reported to the cabinet. If the testing is performed on a confidential basis, the name and other information specified in KRS 214.645 shall be reported to the cabinet. The cabinet shall continue to provide for anonymous testing and counseling.

(d) The result of a serologic test conducted under the auspices of the cabinet shall not be used to determine if a person may be insured for disability, health, or life insurance or to screen or determine suitability for, or to discharge a person from, employment. Any person who violates the provisions of this subsection shall be guilty of a Class A misdemeanor.

(7) No public health department and no other person in this state shall conduct or hold themselves out to the public as conducting a testing program for acquired immunodeficiency syndrome, acquired immunodeficiency syndrome related complex, or human immunodeficiency virus status without first registering with the cabinet, complying with all other applicable provisions of state law, and meeting the following requirements:

The reporting shall include the data including, but not limited to, CD4 count and viral load, and other information that are necessary to comply with the confidentiality and reporting requirements of the most recent edition of the Centers for Disease Control and Prevention's (CDC) Guidelines for National Human Immunodeficiency Virus Case Surveillance. As recommended by the CDC, anonymous testing shall remain as an alternative. If less restrictive data identifying requirements are identified by the CDC, the cabinet shall evaluate the new requirements for implementation.

(2) The reporting system established under subsection (1) of this section shall:

(c) Require collection of the names and data from all private and public sources of HIV-related testing and care services; and
(d) Use reporting methods that match the CDC’s standards for completeness, timeliness, and accuracy, and follow up, as necessary, with the health care provider making the report to verify completeness, timeliness, and accuracy.

(3) Authorized surveillance staff designated by the cabinet shall:

(a) Match the information from the reporting system to other public health databases, wherever possible, to limit duplication and to better quantify the extent of HIV infection in the Commonwealth;

(b) Conduct a biennial assessment of the HIV and AIDS reporting systems, insure that the assessment is available for review by the public and any state or federal agency, and forward a copy of the assessment to the Legislative Research Commission and the Interim Joint Committee on Health and Welfare;

(c) Document the security policies and procedures and insure their availability for review by the public or any state or federal agency;

(d) Minimize storage and retention of unnecessary paper or electronic reports and insure that related policies are consistent with CDC technical guidelines;

(e) Assure that electronic transfer of data is protected by encryption during transfer;

(f) Provide that records be stored in a physically secluded area and protected by coded passwords and computer encryption;

(g) Restrict access to data a minimum number of authorized surveillance staff who are designated by a responsible authorizing official, who have been trained in confidentiality procedures, and who are aware of penalties for unauthorized disclosure of surveillance information;

(h) Require that any other public health program that receives data has appropriate security and confidentiality protections and penalties;

(i) Restrict use of data, from which identifying information has been removed, to cabinet-approved research, and require all persons with this use to sign confidentiality statements;

(j) Prohibit release of any names or any other identifying information that may have been received in a report to any person or organization, whether public or private, except in compliance with federal law or consultations with other state surveillance programs and reporting sources. Under no circumstances shall a name or any identifying information be reported to the CDC; and

(k) Immediately investigate any report of breach of reporting, surveillance, or confidentiality policy, report the breach to the CDC, develop recommendations for improvements in security measure, and take appropriate disciplinary action for any documented breach.
