Summary of Discussion: immunization

Key issues and decisions made impacting ACNM members:

1. Childhood vaccine schedule
 - a. Minor changes
2. Adult Vaccine Schedule
 - a. New language about HPV vaccine, meningococcal and pneumococcal vaccines.
 - b. The schedule is getting more and more complicated
3. Meningococcal
 - a. Outbreak of rare invasive type (serogroup C) among MSM in Chicago, many were HIV+
4. Influenza
 - a. Southern Hemisphere has a broad activity of type A and B strains.
 - b. Pneumonia and influenza mortality data now linked to NCHS surveillance system
 - c. Study presented on high dose Fluzone being effective
 - d. New research in aTIV vaccine with unique MF59, which is a cholesterol like adjuvant which activates immune antigen (like surfactant). May work better when there is a mismatch between vaccine and outbreaks of non-matched strains
5. HPV
 - a. Vaccination coverage: Better coverage in low income black/Hispanics; West and NE;
 - b. Improving rates included
 - i. weVaxTeens.org
 - c. Safety data indicates no different than other vaccines

CONCLUSIONS:

1.

Why it was important for ACNM to be present at this meeting: the flow of timely information on vaccinating women from this meeting is very important for ACNM and its members. Also, the committee welcomes the input of ACNM.

Follow up: The new adult vaccine schedule needs to be approved by ACNM and sent to the CDC, then sent to JMWH and Quickening for publications

Next Meeting: February 24- 25, 2016

Feedback (any thoughts or suggestions you may have): I

In two or three lines, what do you feel is the most important take-away message from this meeting? The ACIP is a body that makes all the decisions about vaccine recommendations in the US. Their decisions should be distributed to our members.
