

VANCOUVER

Normal Labour & Birth: 5th International Research Conference July 20-23, 2010

5th of the International Normal Labour and Birth Research Conference Series:

hosted by the North American Steering Committee of this series and
the Midwifery Program at the University of British Columbia
in collaboration with the University of Central Lancashire.

CALL FOR ABSTRACTS

Research presentation abstracts relating to the following 5 Conference themes are invited:
Defining and Describing Normal Birth, Practice, Public Information, Education, and Policy.

Priority Research Areas

Defining and Describing Normal Birth

- ◆ Development and modulation of belief systems in maternity care.
- ◆ Descriptive data on characteristics of normal, undisturbed labour and birth.
- ◆ Physical and psychosocial consequences of physiologic birth.

Practice

- ◆ Practice models or components of care that promote physiologic birth.
- ◆ Multidisciplinary strategies to promote physiologic birth.
- ◆ Conflict resolution in labour and delivery.
- ◆ Impact of obstetric interventions and/or pharmacologic agents in labour and birth.
- ◆ Measuring outcomes of physiologic labour and birth.

Public Information

- ◆ The bioethics of provider interactions with women's choices.
- ◆ Social and cultural implications of optimal childbirth.
- ◆ Evaluations of client satisfaction.
- ◆ Client-led/community-based research.
- ◆ Public perceptions of use of pharmacologic agents in birth care.

Education

- ◆ Curriculum to enhance knowledge about physiologic birth.
- ◆ Strategies to develop knowledge, skills, and confidence to support physiologic birth.
- ◆ Interprofessional education.

Policy

- ◆ Cost-effectiveness of normal birth care.
- ◆ Access to maternity care resources.
- ◆ Linkages between normal birth and primary health care reform.
- ◆ Initiatives aimed at low-intervention care and undisturbed birth.

Abstracts will be accepted through Thursday, December 31, 2009

To submit an abstract, follow instructions at:
