TO MEMBERS OF THE UNITED STATES SENATE:

The undersigned organizations are opposed to the amendment introduced by Senator Roy Blunt (R-MO) that would jeopardize quality health insurance coverage for millions of people in this country.

The Blunt Amendment #1520 to S. 1813, the Surface Transportation bill, allows any employer or insurance company, religious or not, to deny health insurance coverage for any essential or preventive health care service that they object to on the basis of religious beliefs or moral convictions. That means employers and insurance companies can not only deny access to birth control, they can deny access to any health care service required under the new health care law, including maternity care for unmarried women, vaccines for children, blood transfusions, HIV/AIDS treatment, or type II diabetes screenings. This expansive control over employees' coverage will have a harmful impact on all people, and it will discriminate against those who need access to essential health services the most.

In short, the Blunt amendment would eviscerate critical protections in the Affordable Care Act and completely undermine a fundamental principle of the health care law—that everyone in this country deserves a basic standard of health insurance coverage.

We urge you to reject the Blunt amendment and oppose all efforts to undermine peoples' access to health care.

Sincerely,

Advocates for Youth
